- React-/Native
- Javascript
- CMS(Wordpress, Dandomain and Shopify)

## Sprog

- Dansk (Native)
- Engelsk (Native)

# Sophia Anina Kingston

## About me

I'm a Web Development student with a strong interest in building modern, user-friendly, and scalable digital solutions. I enjoy working across both frontend and backend development and have experience with Python, NestJS, JavaScript, React and React Native, as well as Docker.

I have worked with relational, graph, document, and NoSQL databases and have experience developing and managing websites using CMS and e-commerce platforms such as WordPress, DanDomain, and Shopify. I also work with Figma and UX principles, allowing me to combine technical development with thoughtful, user-centered design.

I'm eager to continue developing my skills, contribute to real-world projects, and grow as a full-stack web developer.
